

Tejendra Purohit

Backend Developer
Jodhpur, Rajasthan

tejendrapurohit555@gmail.com — GitHub — LinkedIn — Portfolio

Professional Summary

Backend-oriented developer with practical experience building API-driven applications using PHP, MySQL, and Django. Comfortable with MVC organization, authentication workflows, relational database design, request validation, and modular backend implementation. Focused on maintainable backend architecture, structured logic separation, and implementation-driven development.

Technical Skills

Languages: PHP, Python, JavaScript, Java, C, C++

Backend: REST APIs, Authentication, Session Management, MVC Architecture, Middleware Workflows, Request Validation

Databases: MySQL, PostgreSQL, SQLite, Supabase

Frameworks & Tools: Django, Django REST Framework, Git, Linux

Frontend: HTML5, CSS3, Bootstrap

Experience

Backend Developer Intern Dec 2025 – Mar 2026
Siddhi Software Company (Remote)

- Contributed to backend implementation for API-driven applications involving structured database workflows and request handling.
- Worked on backend optimization workflows involving caching strategies and scheduled backend processes.
- Assisted in debugging backend modules and improving API and database interaction consistency.
- Participated in backend architecture discussions related to modular organization and implementation planning.
- Contributed to backend feature development using tooling-assisted workflows while maintaining conceptual understanding of application logic.

Education

Bachelor of Computer Applications (BCA) 2023 – 2026
JNVU, Jodhpur (*Completed*)

Senior Secondary (12th) – PCMB 2023
RBSE, Rajasthan

Secondary (10th) 2021
RBSE, Rajasthan

Projects

SecretLetter – Secure Messaging & Encryption API PHP, OpenSSL

- Built a zero-storage encryption platform with a separated frontend and headless PHP API backend for encryption and decryption workflows.
- Organized backend code into controllers, models, middleware, and views, separating request handling from encryption logic.
- Implemented multi-layer encryption using OpenSSL with JSON-based API communication and structured request validation.

- Designed the backend to process sensitive payloads without persisting message content or maintaining application storage.

Elyra – College Mental Health Platform

Web Application

- Developed a college project focused on providing a digital platform around mental-health awareness and student well-being.
- Structured the application as an accessible web experience for presenting mental-health information and user-facing resources.
- [Live Project](#)

Zen Master – Interactive Patience Assessment

HTML, CSS, Bootstrap, JavaScript

- Built a responsive interactive quiz with 10 questions, real-time progress tracking, result evaluation, and patience-focused guidance.
- Implemented persistent theme preferences, responsive navigation, keyboard-friendly interactions, and mobile-oriented UI behavior.
- [Source Code](#) — [Live Demo](#)

Sporty Countdown

HTML, CSS, JavaScript

- Built a responsive countdown utility supporting configurable hours, minutes, and seconds with start/stop controls.
- Implemented keyboard shortcuts, input constraints, completion animation, and a lightweight confetti effect using JavaScript.
- [Source Code](#) — [Live Demo](#)

TejendraPresents – Presentation Management Hub

HTML, CSS, JavaScript

- Built a static presentation hub for organizing and presenting college material across Cloud Computing and Cybersecurity topics.
- Structured content into categorized presentation sections with direct access to external presentation resources.
