

Tejendra Purohit

Software Engineer
Jodhpur, Rajasthan

tejendrapurohit555@gmail.com — GitHub — LinkedIn — Portfolio

Professional Summary

Software engineering-focused developer with experience building modular backend applications, REST APIs, and database-driven systems using PHP and Python. Interested in maintainable software architecture, backend workflow design, debugging, and structured application development. Comfortable translating functional requirements into modular implementation workflows.

Technical Skills

Languages: PHP, Python, Java, JavaScript, C, C++

Software Engineering Concepts: REST APIs, Authentication, MVC Organization, Middleware Workflows, Request Validation, Debugging

Databases: MySQL, PostgreSQL, SQLite

Frameworks & Tools: Django, Git, Linux

Experience

Backend Developer Intern

Dec 2025 – Mar 2026

Siddhi Software Company (Remote)

- Contributed to backend implementation tasks involving API workflows, backend optimization, and structured data processing.
- Worked on caching-related backend improvements and scheduled backend workflow handling.
- Assisted in debugging backend modules and improving consistency across application workflows.
- Participated in technical discussions related to backend architecture organization and implementation planning.

Education

Bachelor of Computer Applications (BCA)

2023 – 2026

JNVU, Jodhpur (*Completed*)

Senior Secondary (12th) – PCMB

2023

RBSE, Rajasthan

Secondary (10th)

2021

RBSE, Rajasthan

Projects

SecretLetter – Secure Messaging & Encryption Platform

PHP, OpenSSL, JavaScript

- Built a full-stack encryption platform combining a static frontend with a headless PHP API for encryption and decryption operations.
- Structured the backend into controllers, models, middleware, and views while integrating frontend JavaScript with JSON API workflows.
- Implemented multi-layer encryption, request validation, and zero-storage processing for sensitive message payloads.
- Source Code — Live Demo

Elyra – College Mental Health Platform

Web Application

- Developed a college web project centered on mental-health awareness and student well-being.
- Built an accessible user-facing experience for presenting mental-health information and related resources.

- [Live Project](#)

Zen Master – Interactive Patience Assessment

HTML, CSS, Bootstrap, JavaScript

- Developed a responsive quiz application with question progression, real-time progress tracking, result evaluation, and guidance content.
- Added persistent light/dark themes, mobile-responsive layouts, keyboard-friendly interactions, and dynamic JavaScript behavior.
- [Source Code](#) — [Live Demo](#)

Sporty Countdown

HTML, CSS, JavaScript

- Built a responsive countdown application with configurable time inputs, start/stop controls, keyboard shortcuts, and completion feedback.
- Implemented JavaScript-driven timer logic, input constraints, animations, and a lightweight confetti effect.
- [Source Code](#) — [Live Demo](#)

TejendraPresents – Presentation Management Hub

HTML, CSS, JavaScript

- Built a static presentation hub organizing college presentations into Cloud Computing and Cybersecurity categories.
- Created structured navigation and presentation access for an organized academic presentation experience.
